INSTRUCTIONS FOR MAKING COFFEE

- "Cleaning your Coffeemaker." Before using the coffeemaker for the first time, clean it thoroughly. Refer to
- 2 Always use the coffeemaker on a dry, level, heat-resistant surface, away from
- ω With the basket and stem removed, fill the coffeemaker with COLD water to just occurs from the faucet spout, tighten the faucet cap. If there is no dripping and the coffeemaker body, tighten the nut inside the coffeemaker. If the dripping above the faucet. Check for any dripping. If dripping occurs between the faucet maximum cup level cup level. Marks on inside of the coffeemaker show cup levels. Do not fill past present, or has been stopped, fill the coffeemaker with cold water to the desired
- 4 adjusted to suit your preference. Place the stem and basket in the coffeemaker. For models with a plastic basket strength coffee which most people prefer. The amount of coffee used can be basket can flood. The amount of ground coffee recommended will make mildinto the stem opening. Do not use "Drip" or finely ground coffee because the standard measuring cups to measure the grounds. Do not let any grounds fall use depending on the cup level. Spread the grounds evenly in the basket. Use perk or regular grind coffee to the basket using the chart below for the amount to stem. When they're connected, let the basket and stem tip upright. Add electric unit well, angle the stem away from you, then place the basket on the heating well in the bottom of the coffeemaker. Or, place the stem into the heating squeeze the top of the basket to hold the stem in place. Place the stem into the you may find it easier to insert the stem in the opening in the basket then
- move the coffeemaker, extreme caution should be used because the cover only moving an appliance containing hot liquids is not recommended, if you must clockwise until the cover is completely locked into the handle slots. Note: While the coffeemaker is tipped over, make sure that the cover has been turned Place the cover on the coffeemaker and turn to lock into the handle slots. Note the arrows on the cover for correct turning. To reduce coffee spills, especially if temporarily reduces coffee from spilling if the coffeemaker is tipped over.
- 6 Plug the cord into a 120 volt AC grounded electric outlet ONLY. If applicable, set the "ON/OFF" switch to "ON."
- 7 and stem. Using a hot pad, remove the coffee basket, and stem. If the coffee in (and the switch is "ON"). Before serving, turn the cover to remove the basket than 1 minute brewing time). Coffee is ready when the light in the base glows. The coffeemaker will stop perking automatically (each cup requires no longer handle slots into the coffee. Replace the cover making sure it is completely locked into the basket and stem are not removed, bitter oils from the extracted grounds will drip Coffee will remain at serving temperature as long as the coffeemaker is plugged

- Keep cord away from hot parts of the appliance and hot surfaces during operation. Close supervision is necessary when this appliance is used by or near children.
- 9 When about 3 cups of coffee remain in the coffeemaker, or when the coffee can from the electrical outlet. Note: Liquid must always cover the inside bottom of the no longer be seen in the view tube, turn the switch "OFF" and unplug the cord until it locks into the open position. Lower the handle when the server is filled.
- SPECIAL NOTE ON GRINDING COFFEE BEANS: If you grind your own coffee appliance at all times. Falling below the minimum level could cause overheating and damage to internal components and will void the warranty.

beans, grind to medium coarseness for best results. DO NOT grind too fine (powder-like) because this can cause the basket to flood
